This Volume

FOREWORD

The data collection programs of the Department of Water Resources have been designed to supplement the activities of other agencies to satisfy specific needs of the State. Bulletin No. 130-67 presents useful, comprehensive, accurate, and timely hydrologic data which are prerequisites for effective planning, design, construction, and operation of water facilities.

The Bulletin No. 130 series is published annually in five volumes. Each volume presents hydrologic data for one of five reporting areas of the State. These areas are delineated on the map to the left.

William R. Gianelli, Director
Department of Water Resources
The Resources Agency
State of California

ACKNOWLEDGMENTS

In the preparation of this report, valuable assistance and contributions were received from many public and private agencies. Special mention is made of the following agencies whose cooperation is gratefully acknowledged.

City of Long Beach Water Department
City of Los Angeles Department of Water and Power
City of San Diego Utilities Department
Coachella Valley County Water District
Imperial Irrigation District
Los Angeles County Flood Control District
Orange County Flood Control District
Riverside County Flood Control and Water Conservation District
San Bernardino County Flood Control District
San Bernardino Valley Water Conservation District
San Diego County Department of Special District Services
San Luis Obispo County Flood Control and Water
Conservation District
Santa Barbara County Flood Control and Water Conservation District
The Metropolitan Water District of Southern California
United States Army Corps of Engineers
United States Geological Survey
United States Weather Bureau
Ventura County Flood Control District

ABSTRACT

This report contains data on precipitation, evaporation, air temperature, surface water flow, reservoir storage, ground water levels, and ground water recharge activities in Southern California during the 1966-67 water year. Figures show location of hydrologic areas within drainage provinces, representative precipitation characteristics, imported water, and fluctuation of water level in wells.

Appendix A
CLIMATOLOGICAL DATA

Appendix A

CLIMATOLOGICAL DATA

This appendix summarizes monthly precipitation, air temperature, and evaporation data for Southern California from July 1, 1966, through September 30, 1967 (Tables A-2, A-3, and A-4).

Cooperators and cooperating agencies supplied data from 675 precipitation stations, 101 air temperature stations, and 53 evaporation stations. The U. S. Weather Bureau supplied data from 250 precipitation stations, 125 air temperature stations, and 9 evaporation stations. These climatological stations are listed in the Index (Table A-1). Daily and hourly data for some stations are available in the files of the Southern District of the Department of Water Resources. Representative precipitation characteristics for four stations are shown in Figures A-1 through A-4.

To ensure accuracy, the stations are inspected periodically by the responsible agency to see that equipment is properly maintained and that observations are taken in accordance with their standards.

Each station in this appendix has been assigned an identification number. The first character denotes the drainage province. The second and third characters represent the hydrologic unit. (Figures C-1 through C-6, pages 92 through 103, in Appendix C show the locations and code numbers of the hydrologic subdivisions in each drainage province.) The remaining characters denote the alphabetical sequence of the station.

Figure A-1

TABLE A-1 INDEX OF CLIMATOLOGICAL STATIONS

An explanation of the column headings and the code symbols follows:

40-Acre Tract – This denotes the location of the station within the section in which it is located. The letter code is derived from the diagram to the right.

D	C	B	A
E	F	G	H
M	L	K	J
N	P	Q	R

Base and Meridian – The code for this column is as follows:

- M – Mount Diablo Base and Meridian, or
- S – San Bernardino Base and Meridian

Cooperator Number – This number is assigned from the following list:

000	Private Cooperators
004	Southern California Edison Company
011	Southern Pacific Company
014	California-American Water Company
016	Temescal Water Company
017	Gage Canal Company
018	Corona Foothill Mutual Lemon Company
405	City of Los Angeles, Department of Water and Power
406	City of San Diego
410	Los Angeles County Flood Control District
411	Marin County Engineer
415	Orange County Flood Control District
416	Ventura County Flood Control District
417	The Metropolitan Water District of Southern California
428	San Diego County
429	San Bernardino County Flood Control District
430	San Luis Obispo County Flood Control and Water Conservation District
431	Riverside County Flood Control and Water Conservation District
432	Vista Irrigation District
433	Helix Irrigation District
435	Montecito County Water District
436	City of San Bernardino Water Department
808	State Division of Forestry
813	State Department of Water Resources
900	United States Weather Bureau (Published records)
906	Agriculture Research Service
907	United States Weather Bureau, State Climatologist, (Unpublished records)
913	United States Army Corps of Engineers, Los Angeles District
914	United States Marine Corps, Camp Pendleton
915	United States Weather Bureau, Washington, D. C , (Unpublished records)
916	United States Geological Survey

Cooperator's Index Number – This is the number assigned to the station by the agency responsible for, or handling the records of the station. The U.S. Weather Bureau number is only shown in this column when it differs from the alpha order number.

County – This is a standard code for California counties and adjacent areas as shown below:

Imperial	13	Monterey	27	San Diego	90
Inyo	14	Orange	30	San Luis Obispo	40
Kern	15	Riverside	33	Santa Barbara	42
Los Angeles	70	San Bernardino	36	Ventura	56
Mono	26

TABLE A-2
PRECIPITATION DATA

The definition of terms and abbreviations used in connection with this table are as follows:

- No record or record incomplete.
- * Amount included in the following measurement. Time distribution unknown.
- E Wholly or partially estimated.
- T Trace, an amount too small to measure.
- V Includes total from previous month.
- RB Record begins.
- RE Record ends.

Precipitation values are shown to the nearest hundredth (.01) of an inch, except where Fischer & Porter recording rain gages are used, these values are shown to the nearest tenth (.1) of an inch.

TABLE A-3

AIR TEMPERATURE DATA

The definition of terms and abbreviations used in connection with this table are as follows:

Max	The highest temperature of record for the month.
Min	The lowest temperature of record for the month.
Av Max	The arithmetical average of daily maximum temperatures for the month.
Av Min	The arithmetical average of daily minimum temperatures for the month.
Avg	The arithmetical average of daily maximum and minimum temperatures for the month.
--	No record or record incomplete.
M	One or more days of record missing; if average value is entered, less than ten days of record is missing.
RB	Record begins.
RE	Record ends.

TABLE A-4
EVAPORATION DATA

The definition of terms and the abbreviations used in connection with this table are as follows:

Evap	The total amount of water evaporated from the pan for the month.
Wind	The amount of movement of air over the pan in miles for the month.
Temp-Max	Arithmetical average of daily maximum water temperature for the month.
Temp-Min	Arithmetical average of daily minimum water temperature for the month.
--	No record.
E	Wholly or partially estimated.
M	One or more days of record missing; if average value is entered, less than ten days of record is missing.
RB	Record begins.
RE	Record ends.

Wind and water temperature data are not available at all evaporation stations.

Appendix B
SURFACE WATER MEASUREMENTS

Appendix B

SURFACE WATER MEASUREMENTS

This appendix presents surface water data for Southern California from October 1, 1966 through September 30, 1967. These data consist of summary tables of annual unimpaired runoff from major streams (Table B-1), daily mean discharge (Table B-2), diversions from the Colorado River (Figure B-1), imported water (Figure B-2), and monthly water content of major reservoirs (Table B-3).

Each station in this appendix has been assigned an identification number.

TABLE B-1 - ANNUAL UNIMPAIRED RUNOFF
AT SELECTED STATIONS

Unimpaired runoff is defined as the flow that occurs naturally at a point in a stream if there were: (1) no upstream controls such as dams or reservoirs; (2) no artificial diversions or accretions; and, (3) no change in ground water storage resulting from development. The computed natural, or unimpaired, runoff values are considered to be the flows that would occur if no impairments were upstream from the measurement points.

TABLE B - I

ANNUAL UNIMPAIRED RUNOFF AT SELECTED STATIONS

In percent of average

* Average unimpaired runoff in acre-feet computed from the 50-year period October 1915 through September 1965

** Data prior to October 1927 from D.W.R. Bulletin No. 1. Listed as "Sespe Creek near Sespe."

TABLE B-2

DAILY MEAN DISCHARGE

The discharge figures in this table have been rounded off as follows:

1. Daily flows - second-feet

0.0	- 9.9	nearest	Tenth
10	- 999	"	Unit
1,000	- 9,999	"	Ten
10,000	- 99,999	"	Hundred
100,000	- 999,999	"	Thousand

2. Monthly means - second-feet

0.0	- 99.9	nearest	Tenth
100	- 9,999	"	Unit
10,000	- 99,999	"	Ten
100,000	- 999,999	"	Hundred

3. Yearly totals - acre-feet

0.0	- 9,999	nearest	Unit
10,000	- 99,999	"	Ten
100,000	- 999,999	"	Hundred
1,000,000	- 9,999,999	"	Thousand

Appendix C
GROUND WATER MEASUREMENTS

Appendix C

GROUND WATER MEASUREMENTS

This appendix contains ground water level measurements (Table C-1) for approximately 8,000 wells for the period October 1, 1966, through September 30, 1967. It also contains hydrographs of selected wells (Figure C-7) and a tabulation of ground water replenishment (Table C-2).

Two numbering systems are used by the Department to facilitate processing of water level measurement data. The two systems are the *Areal Designation* and the *State Well Numbering System* as described below.

The *Areal Designation System* comprises a series of major drainage provinces which are further subdivided into hydrologic units, hydrologic subunits, and hydrologic subareas. A coding system of the form U-04.A2 has been developed as follows:

Figures C-1 through C-6 show the location and code number of each hydrologic subdivision in each drainage province, as well as the location of wells for which hydrographs are shown in Figure C-7.

The *State Well Numbering System* is based on township, range, and section subdivisions of the Public Land Survey. The number of a well, assigned in accordance with this system, is referred to as the *State Well Number*, as illustrated below:

This number identifies and locates the well. In the example, the well is in Township 39 North, Range 13 East, Tract K of Section 8, located in the Mount Diablo Base and Meridian. A section is divided into 40-acre tracts as shown:

D	C	B	A
E	F	G	H
M	L	K	J
N	P	Q	R

Sequence numbers in a tract are generally assigned in chronological order. The example designates the fourth well to be assigned a number in Tract K.

TABLE C - 1 GROUND WATER LEVELS AT WELLS

An explanation of the column headings and the code symbols follows:

State Well Number — Refer to the explanation at the beginning of Appendix C.

Ground Surface Elevation — The numbers in this column are the elevation in feet above mean sea level (USGS Datum) of the ground surface at the well. Elevations are usually taken from topographic maps and the accuracy is controlled by topographic standards.

Date — The date shown in the column is the date when the depth measurement given in the next column was made.

Ground Surface to Water Surface — This is the measured depth in feet from the ground surface to the water surface in the well; certain of the depth measurements in the column may be followed by a number in parentheses to indicate a questionable measurement. The code applicable to these "questionable measurements" is as follows:

- | | |
|--------------------------------------|--|
| (1) Pumping | (6) Other |
| (2) Nearby pump operating | (7) Recharge operation at or near well |
| (3) Casing leaking or wet | (8) Oil in casing |
| (4) Pumped recently | (9) Caved or deepened |
| (5) Air or pressure gage measurement | |

When a measurement was attempted, but could not be obtained, then only a number in parentheses is shown in the column. The code applicable to these "no measurements" is as follows:

- | | |
|-------------------------------|-------------------------------|
| (1) Pumping | (6) Well has been destroyed |
| (2) Pump house locked | (7) Special |
| (3) Tape hung up | (8) Casing leaking or wet |
| (4) Cannot get tape in casing | (9) Temporarily inaccessible |
| (5) Unable to locate well | (0) Measurements discontinued |

The words *flow* and *dry* are shown in this column to indicate a flowing or dry well, respectively. A minus preceding the number in this column indicates that the static water level in the well is this distance in feet above the ground surface.

Water Surface Elevation — This is the elevation in feet above mean sea level (USGS Datum) of the water surface in the well. It was derived by subtraction of the depth measurement from the ground surface elevation.

Agency Supplying Data — Each number in this column is the code number for the agency supplying data for that measurement. The agencies supplying data for this report and the code numbers assigned to them are as follows:

Agency code	Agency name	Agency code	Agency name
005	United States Bureau of Reclamation	402	Ramona Municipal Water District
010	United States Geological Survey	404	Santa Maria Valley Water Conservation District
015	United States International Boundary and Water Commission	405	Vista Irrigation District
050	State Department of Water Resources	408	Fallbrook Public Utilities District
051	Patton State Hospital	411	United Water Conservation District
061	State Department of Water Resources, Watermaster Service, West Coast Basin	412	Metropolitan Water District of Southern California
062	State Department of Water Resources, Watermaster Service, Raymond Basin	420	Helix Irrigation District
100	San Bernardino County Flood Control District	700	Palm Springs Water Company
101	Los Angeles County Flood Control District	701	Corona Foothill Mutual Lemon Company
102	Orange County Flood Control District	702	Cucamonga County Water District
103	Riverside County Flood Control and Water Conservation District	703	California-American Water Company
104	East San Bernardino County Water District	704	Mr. E. J. Ebersole
117	San Luis Obispo County Flood Control and Water Conservation District	706	Fontana Union Water Company
121	Ventura County Flood Control District	708	Vail Company
124	West San Bernardino County Water District	709	Irvine Company
131	Coachella Valley County Water District	710	Green Mutual Water Company
200	City of Los Angeles Department of Water and Power	711	Escondido Mutual Water Company
201	City of Colton Water Department	713	W. P. Rowe & Son
202	City of Oceanside Water Department	715	Santa Ana Valley Irrigation Company
203	City of Redlands Water Department	716	South Elsinore Mutual Water Company
204	City of Riverside Water Department	717	Temescal Water Company
205	Carlsbad Municipal Water District	718	A. A. Webb & Associates
206	City of Long Beach Water Department	719	West End Consolidated Water Company
209	City of Oxnard Water Department	720	Riverside Water Company
210	City of Anaheim Water Department	721	Francis Mutual Water Company
225	Santa Paula Water Works, LTD.	723	Pine Valley Mutual Water Company
228	City of Ontario Water Department	727	Julian Mutual Water Company
229	City of San Diego Water Department	733	San Gabriel Valley Protective Association
230	City of San Bernardino Water Department	742	Yorba Linda County Water District
235	City of Upland Water Department	748	San Antonio Water Company
272	City of Corona Water Department	750	San Luis Rey Heights Mutual Water Company
400	San Bernardino Valley Water Conservation District	753	Limoneira Company
401	Beaumont Irrigation District	776	Southern California Water Company
		783	Riverside Highland Water Company
		785	California Portland Cement Company
		847	Gage Canal Company
		850	Kaiser Steel Corporation
